-!- FUNCTION: THIS GLUCOAMILASE HAS A SPECIFICITY TOWARD BOTH

-!- FUNCTION: THIS GLUCOAMILASE HAS A SPECIFICITY TOWARD BOTH

ALPHA-1, 4 AND ALPHA-1, 6 LINKAGES.

-!- CATALYTIC ACTIVITY: Hydrolysis of terminal 1,4-linked alpha-D-

glucose residues auccessively from non-reducing ends of the chains

with release of beta-D-glucose.

-!- SIMILARITY: BELONGS TO FAMILY 31 OF GLYCOSYL HYDROLASES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               STKEVLESTKGNPLVFSNQFIQFNSSLPRNHV-ITGLGESIHGLVNBPGSVK-----T
